Within "CommodityPremium" complex type, made element "premiumPerUnit" optional.

Rationale: Either "premiumPerUnit" or "paymentAmount" must be mandatory in Transparency view as one or the other is the "price" to be communicated to the market. Since "premiumPerUnit" is optional in Confirmation View and "paymentAmount" is required, the Comm WG decided to have the same in the TV

In Transparency View only the following changes have been made:

1. Within commodityOption and commoditySwaption, made element "premium" required.

Rationale: The premium/premiumPerUnit must be mandatory as the "price" needs to be communicated to the market.

2. Within OilPipelineDelivery complex type reverted the element "risk" to status optional. Rationale: it is an optional element in the Confirmation View.

3. Within OilTransferDelivery complex type removed element "applicable" since the CommWG agreed to make the "deliveryLocation" element required. Note: "deliveryLocation" element which is optional in the

Confirmation View is made required in the Transparency View because P.S. believes it is price forming information and the optional status of the element in the Confirmation View is an oversight.

4. Removed "CommoditySettlementPeriodsNotionalQuantitySchedule" complex type because it is an orphan in Transparency View.
5. Removed "CommoditySettlementPeriodsNotionalQuantity" complex type because it is an orphan in Transparency View.
6. Removed "CommodityDeliveryPeriodsPointer.model" group because it is an orphan in Transparency View.
7. Removed "SettlementPeriodsSchedule" complex type because it is an orphan in Transparency View.
8. Removed "CommodityPhysicalQuantitySchedule" complex type because it is an orphan in Transparency View.
9. Within "CommodityDeliveryPoints.model" removed a sequence of elements "entryPoint" and "withdrawalPoint" Rationale: nonStandardFeature

1. To further support of the commodity products, updated BullionTypeEnum

1.1 Added the following values:

- "Iridium" - Quality as per the Good Delivery Rules for Iridium.
- "Ruthenium" - Quality as per the Good Delivery Rules for Ruthenium.

2. Corrected DeliveryDatesEnum values with leading numerals:

2.1. leading numerals were spelled out.

Rationale: use consistent naming and to avoid issues with JAXB (for details see issue - <http://www.fpml.org/issues/view.php?id=1111>)
