2. Working Group Admin

- **Join a Working Group**

When the Standards Committee decides to form a new working group, based on the interest expressed through various channels and the availability of an initial proposal, a call for participation in an FpML Working Group will be issued to allow interested parties from various industries to participate in this working group. To Join a Working Group fill out the [Join a Working Group Form](#) (../lists/?p=subscribe&id=1) . For more information, see the respective working groups and the press section.
- **Propose a New Group**

FpML® monitors interest in asset classes, functionality and non-product topics through various channels. An important source of information is the [Call for Interest Form](#) (../lists/?p=subscribe&id=5) , where we ask you to indicate your interest in future developments of the FpML standard. The standards committee regularly reviews the results of the call for interest and will suggest a new group whenever appropriate. The [roadmap](#) (../roadmap/roadmap.pdf) can be used to set the content of future work in relation to current work and achievements.
- **View Mailing List Archive**

Click [here](#) (../wg/maillarch.html) to view the mailing list archive for all active working groups.

3. Committees
