Added DSWG extensions to SingleUnderlyer, BasketConstituent, Price, Commission, and DividendPayout.

- SingleUnderlyer: added couponPayments element which holds any pending coupon payments that may be required for bonds.

Commit message - BasketConstituent: added couponPayments element which holds any pending coupon payments that may be required for bonds.

- Price: added the cleanNetPrice element to support reporting clean prices for bonds and the optional quotationCharacteristics element, which allows information about how the quotations were obtained to be added.

- Commission: added the commissionPerTrade element can be

calculated as the average commission on the underlying assets times the current number of securities outstanding. It does not represent the historical commission paid to achieve the current position.

- DividendPayout: added zero or more dividendPayment elements, of type PendingPayments. This element describes pending dividend payments.

To maintain consistency and accommodate various XML tool GUI's, the xml:lang of "en" (English) has been placed before other available alternative languages.

Commit message
This change effectively makes English the default language for schema descriptions.
