This element introduced in WD#2 has been moved to the choice group within EquityExercise, which is now called "EquityExerciseValuationSettlement" because it provides support for all of these features, structured in three areas

1. our own equity exercise types
2. choice group supporting option (automatic exercise, make whole for early exercise) or forward features (pre payment)
3. valuation and settlement

// EquityExercise in file fpml-eqd-4-2.xsd

```
<xsd:choice>
  <!-- add sequence for option features -->
  <xsd:sequence>
    <xsd:element name="automaticExercise"
type="xsd:boolean"/>
    <!-- moved here -->
    <xsd:element name="makeWholeProvisions"
type="MakeWholeProvisions" minOccurs="0"/>
  </xsd:sequence>
  <!-- leave existing element for forward feature -->
  <xsd:element name="prePayment" type="PrePayment"/>
</xsd:choice>
```

- Added position identification elements: positionId, version.
- Changed constituent content:
 - Made choice structure optional for extensibility purposes.
 - Added positionVersionReference to reference the information of a submitted position.
 - Changed to a single partyTradeIdentifier block to reduce ambiguity.
