## ***1 Global Complex Types***

## 1.1 AffectedTransactions

### 1.1.1 Description:

### 1.1.2 Contents:

Either

**trade** (exactly one occurrence; of the type Trade) An element that allows the full details of the trade to be used as a mechanism for identifying the trade for which the post-trade event pertains

Or

**tradeReference** (exactly one occurrence; of the type PartyTradeIdentifiers) A container since an individual trade can be referenced by two or more different partyTradeIdentifier elements - each allocated by a different party.

### 1.1.3 Used by:

- Complex type: CreditEventNoticeDocument

### 1.1.4 Derived Types:

### 1.1.5 Figure:

### 1.1.6 Schema Fragment:

```
<xsd:complexType name="AffectedTransactions">  
  <xsd:group ref="TradeOrTradeReference.model" maxOccurs="unbounded" />  
</xsd:complexType>
```

## 1.2 Novation

### 1.2.1 Description:

An event type that records the occurrence of a novation

### 1.2.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type Event)

- A type defining the basic structure of FpML business events; it is refined by its derived types.

**transferor** (exactly one occurrence; of the type PartyReference) A pointer style reference to a party identifier defined elsewhere in the document. In a three-way novation the party referenced is the Transferor (outgoing party) in the novation. The Transferor means a party which transfers by novation to a Transferee all of its rights, liabilities, duties and obligations with respect to a Remaining Party. In a four-way novation the party referenced is Transferor 1 which transfers by novation to Transferee 1 all of its rights, liabilities, duties and obligations with respect to Transferor 2. ISDA 2004 Novation Term: Transferor (three-way novation) or Transferor 1 (four-way novation).

**transferee** (exactly one occurrence; of the type PartyReference) A pointer style reference to a party identifier defined elsewhere in the document. In a three-way novation the party referenced is the Transferee (incoming party) in the novation. Transferee means a party which accepts by way of novation all rights, liabilities, duties and obligations of a Transferor with respect to a Remaining Party. In a four-way novation the party referenced is Transferee 1 which accepts by way of novation the rights, liabilities, duties and obligations of Transferor 1. ISDA 2004 Novation Term: Transferee (three-way novation) or Transferee 1 (four-way novation).

**remainingParty** (exactly one occurrence; of the type PartyReference) A pointer style reference to a party identifier defined elsewhere in the document. In a three-way novation the party referenced is the Remaining Party in the novation. Remaining Party means a party which consents to a Transferor's transfer by novation and the acceptance thereof by the Transferee of all of the Transferor's rights, liabilities, duties and obligations with respect to such Remaining Party under and with respect of the Novated Amount of a transaction. In a four-way novation the party referenced is Transferor 2 per the ISDA definition and acts in the role of a Transferor. Transferor 2 transfers by novation to Transferee 2 all of its rights, liabilities, duties and obligations with respect to Transferor 1. ISDA 2004 Novation Term: Remaining Party (three-way novation) or Transferor 2 (four-way novation).

**otherRemainingParty** (zero or one occurrence; of the type PartyReference) A pointer style reference to a party identifier defined elsewhere in the document. This element is not applicable in a three-way novation and should be omitted. In a four-way novation the party referenced is Transferee 2. Transferee 2 means a party which accepts by way of novation the rights, liabilities, duties and obligations of Transferor 2. ISDA 2004 Novation Term: Transferee 2 (four-way novation).

**novationDate** (exactly one occurrence; of the type xsd:date) Specifies the date that one party's legal obligations with regard to a trade are transferred to another party. It corresponds to the Novation Date section of the 2004 ISDA Novation Definitions, section 1.16.

**novationTradeDate** (zero or one occurrence; of the type xsd:date) Specifies the date the parties agree to assign or novate a trade. If this element is not specified, the novationTradeDate will be deemed to be the novationDate. It corresponds to the Novation Trade Date section of the 2004 ISDA Novation Definitions, section 1.17.

Either

**novatedAmount** (exactly one occurrence; of the type Money) The amount which represents the portion of the Old Transaction being novated.

Or

**novatedNumberOfOptions** (exactly one occurrence; of the type xsd:decimal) The number of options which represent the portion of the Old Transaction being novated.

**remainingTrade** (zero or one occurrence; of the type Trade) This element contains a description of the remaining portion of a partially novated trade.

**fullFirstCalculationPeriod** (zero or one occurrence; of the type xsd:boolean) This element corresponds to the applicability of the Full First Calculation Period as defined in the 2004 ISDA Novation Definitions, section 1.20.

**firstPeriodStartDate** (zero or one occurrence; of the type FirstPeriodStartDate) Element that is used to be able to make sense of the "new transaction" without requiring reference back to the "old transaction". In the case of interest rate products there are potentially 2 "first period start dates" to reference – one with respect to each party to the new transaction. For Credit Default Swaps there is just the one with respect to the party that

is the fixed rate payer.

**nonReliance** (zero or one occurrence; of the type Empty) This element corresponds to the non-Reliance section in the 2004 ISDA Novation Definitions, section 2.1 (c) (i). The element appears in the instance document when non-Reliance is applicable.

**creditDerivativesNotices** (zero or one occurrence; of the type CreditDerivativesNotices) This element should be specified if one or more of either a Credit Event Notice, Notice of Publicly Available Information, Notice of Physical Settlement or Notice of Intended Physical Settlement, as applicable, has been delivered by or to the Transferor or the Remaining Party. The type of notice or notices that have been delivered should be indicated by setting the relevant boolean element value(s) to true. The absence of the element means that no Credit Event Notice, Notice of Publicly Available Information, Notice of Physical Settlement or Notice of Intended Physical Settlement, as applicable, has been delivered by or to the Transferor or the Remaining Party.

**contractualDefinitions** (zero or more occurrences; of the type ContractualDefinitions) The definitions (such as those published by ISDA) that will define the terms of the novation transaction.

Either

**contractualSupplement** (zero or more occurrences; of the type ContractualSupplement) DEPRECATED - This element will be removed in the next major version of FpML. The element contractualTermsSupplement should be used instead. Definition: A contractual supplement (such as those published by ISDA) that will apply to the trade.

Or

**contractualTermsSupplement** (zero or more occurrences; of the type ContractualTermsSupplement) A contractual supplement (such as those published by ISDA) that will apply to the trade.

**payment** (zero or one occurrence; of the type Payment)

### 1.2.3 Used by:

### 1.2.4 Derived Types:

### 1.2.5 Figure:

### 1.2.6 Schema Fragment:

```
<xsd:complexType name="Novation">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">
      An event type that records the occurrence of a novation
    </xsd:documentation>
  </xsd:annotation>
  <xsd:complexContent>
    <xsd:extension base="Event">
      <xsd:sequence>
        <xsd:group ref="NovationDetails.model"/>
        <xsd:element name="payment" type="Payment" minOccurs="0"/>
      </xsd:sequence>
    </xsd:extension>
  </xsd:complexContent>
</xsd:complexType>
```

## 1.3 NovationNotificationMessage

### 1.3.1 Description:

Abstract base class for all Novation Notification Messages.

### 1.3.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type NotificationMessage)

- A type defining the basic content for a message sent to inform another system that some 'business event' has occurred. Notifications are not expected to be replied to.

**novation** (exactly one occurrence; of the type Novation)

**party** (one or more occurrences; of the type Party)

### 1.3.3 Used by:

- Complex type: NovationAlleged
- Complex type: NovationConfirmed
- Complex type: NovationMatched
- Complex type: TradeNovated

### 1.3.4 Derived Types:

- Complex type: NovationAlleged
- Complex type: NovationConfirmed
- Complex type: NovationMatched
- Complex type: TradeNovated

### 1.3.5 Figure:

### 1.3.6 Schema Fragment:

```
<xsd:complexType name="NovationNotificationMessage" abstract="true">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">
      Abstract base class for all Novation Notification Messages.
    </xsd:documentation>
  </xsd:annotation>
  <xsd:complexContent>
    <xsd:extension base="NotificationMessage">
      <xsd:sequence>
        <xsd:group ref="NovationMessage.model" />
      </xsd:sequence>
    </xsd:extension>
  </xsd:complexContent>
</xsd:complexType>
```

## 1.4 NovationRequestMessage

### 1.4.1 Description:

Abstract base class for all Novation Request Messages.

### 1.4.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type RequestMessage)

- A type defining the basic content of a message that requests the receiver to perform some business operation determined by the message type and its content.

**novation** (exactly one occurrence; of the type Novation)

**party** (one or more occurrences; of the type Party)

### 1.4.3 Used by:

- Complex type: NovateTrade
- Complex type: NovationConsentRequest
- Complex type: RequestNovationConfirmation

### 1.4.4 Derived Types:

- Complex type: NovateTrade
- Complex type: NovationConsentRequest
- Complex type: RequestNovationConfirmation

### 1.4.5 Figure:

### 1.4.6 Schema Fragment:

```
<xsd:complexType name="NovationRequestMessage" abstract="true">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">
      Abstract base class for all Novation Request Messages.
    </xsd:documentation>
  </xsd:annotation>
  <xsd:complexContent>
    <xsd:extension base="RequestMessage">
      <xsd:sequence>
        <xsd:group ref="NovationMessage.model"/>
      </xsd:sequence>
    </xsd:extension>
  </xsd:complexContent>
</xsd:complexType>
```

## 1.5 NovationResponseMessage

### 1.5.1 Description:

Abstract base class for all Novation Response Messages.

### 1.5.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type ResponseMessage)

- A type refining the generic message content model to make it specific to response messages.

### 1.5.3 Used by:

- Complex type: NovationConsentGranted
- Complex type: NovationConsentRefused

### 1.5.4 Derived Types:

- Complex type: NovationConsentGranted
- Complex type: NovationConsentRefused

### 1.5.5 Figure:

### 1.5.6 Schema Fragment:

```
<xsd:complexType name="NovationResponseMessage" abstract="true">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">
      Abstract base class for all Novation Response Messages.
    </xsd:documentation>
  </xsd:annotation>
  <xsd:complexContent>
    <xsd:extension base="ResponseMessage">
      <xsd:sequence>
        <xsd:sequence minOccurs="0">
          <xsd:group ref="NovationMessage.model"/>
        </xsd:sequence>
      </xsd:sequence>
    </xsd:extension>
  </xsd:complexContent>
</xsd:complexType>
```

## 1.6 PartialTerminationAmount

### 1.6.1 Description:

### 1.6.2 Contents:

### 1.6.3 Used by:

### 1.6.4 Derived Types:

### 1.6.5 Figure:

### 1.6.6 Schema Fragment:

```
<xsd:complexType name="PartialTerminationAmount">
  <xsd:sequence>
    <xsd:choice minOccurs="0">
      <xsd:sequence>
        <xsd:element name="decreaseInNotionalAmount" type="Money">
          <xsd:annotation>
            <xsd:documentation xml:lang="en">
              Specifies the fixed amount by which the Notional
              decreases due to the Partial Termination transaction.
            </xsd:documentation>
          </xsd:annotation>
        </xsd:element>
        <xsd:element name="outstandingNotionalAmount" type="Money">
          <xsd:annotation>
            <xsd:documentation xml:lang="en">
              Specifies the Notional amount after the Partial
              Termination.
            </xsd:documentation>
          </xsd:annotation>
        </xsd:element>
      </xsd:sequence>
    </xsd:choice>
    <xsd:sequence>
      <xsd:element name="decreaseInNumberOfOptions" type="xsd:decimal">
        <xsd:annotation>
          <xsd:documentation xml:lang="en">
            Specifies the fixed amount by which the Number of Options
            decreases due to the Partial Termination transaction.
          </xsd:documentation>
        </xsd:annotation>
      </xsd:element>
      <xsd:element name="outstandingNumberOfOptions" type="xsd:decimal">
        <xsd:annotation>
          <xsd:documentation xml:lang="en">
            Specifies the Number of Options after the Partial
            Termination.
          </xsd:documentation>
        </xsd:annotation>
      </xsd:element>
    </xsd:sequence>
  </xsd:sequence>
</xsd:complexType>
```

## 1.7 Termination

### 1.7.1 Description:

An event type that defines the content of a Termination transaction.

### 1.7.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type Event)

- A type defining the basic structure of FpML business events; it is refined by its derived types.

Either

**trade** (exactly one occurrence; of the type Trade) An element that allows the full details of the trade to be used as a mechanism for identifying the trade for which the post-trade event pertains

Or

**tradeReference** (exactly one occurrence; of the type PartyTradeIdentifiers) A container since an individual trade can be referenced by two or more different partyTradeIdentifier elements - each allocated by a different party.

**terminationTradeDate** (exactly one occurrence; of the type xsd:date) The date on which the the parties enter into the Termination transaction.

**terminationEffectiveDate** (exactly one occurrence; of the type xsd:date) The date on which the Termination becomes effective.

Either

**full** (exactly one occurrence; of the type Empty) The use of the Full element indicates that this is a Full Termination.

Or

**partial** (exactly one occurrence; of the type PartialTerminationAmount) The use of the Partial element indicates that this is a Partial Termination.

**payment** (zero or one occurrence; of the type Payment) A payment for the right to terminate the trade.

### 1.7.3 Used by:

- Complex type: RequestTerminationConfirmation
- Complex type: TerminationConfirmed
- Complex type: TradeTerminationRequest
- Complex type: TradeTerminationResponse

### 1.7.4 Derived Types:

### 1.7.5 Figure:

### 1.7.6 Schema Fragment:

```
<xsd:complexType name="Termination">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">
      An event type that defines the content of a Termination
      transaction.

      </xsd:sequence>
    </xsd:extension>
  </xsd:complexContent>
</xsd:complexType>
```

## 1.8 TradeAmendment

### 1.8.1 Description:

A type describing the original trade and the amended trade.

### 1.8.2 Contents:

Either

**originalTrade** (exactly one occurrence; of the type Trade) The entire original trade details.

Or

**originalTradeIdentifier** (one or more occurrences; of the type PartyTradeIdentifier) The trade id of the original trade details.

**amendedTrade** (exactly one occurrence; of the type Trade) The representation of the amended trade.

### 1.8.3 Used by:

- Complex type: AllocationAmended

### 1.8.4 Derived Types:

### 1.8.5 Figure:

### 1.8.6 Schema Fragment:

          The representation of the amended trade.
        </xsd:documentation>
      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

## ***2 Groups***

## 2.1 NovationDetails.model

### 2.1.1 Description:

#### 2.1.2 Contents:

**transferor** (exactly one occurrence; of the type PartyReference) A pointer style reference to a party identifier defined elsewhere in the document. In a three-way novation the party referenced is the Transferor (outgoing party) in the novation. The Transferor means a party which transfers by novation to a Transferee all of its rights, liabilities, duties and obligations with respect to a Remaining Party. In a four-way novation the party referenced is Transferor 1 which transfers by novation to Transferee 1 all of its rights, liabilities, duties and obligations with respect to Transferor 2. ISDA 2004 Novation Term: Transferor (three-way novation) or Transferor 1 (four-way novation).

**transferee** (exactly one occurrence; of the type PartyReference) A pointer style reference to a party identifier defined elsewhere in the document. In a three-way novation the party referenced is the Transferee (incoming party) in the novation. Transferee means a party which accepts by way of novation all rights, liabilities, duties and obligations of a Transferor with respect to a Remaining Party. In a four-way novation the party referenced is Transferee 1 which accepts by way of novation the rights, liabilities, duties and obligations of Transferor 1. ISDA 2004 Novation Term: Transferee (three-way novation) or Transferee 1 (four-way novation).

**remainingParty** (exactly one occurrence; of the type PartyReference) A pointer style reference to a party identifier defined elsewhere in the document. In a three-way novation the party referenced is the Remaining Party in the novation. Remaining Party means a party which consents to a Transferor's transfer by novation and the acceptance thereof by the Transferee of all of the Transferor's rights, liabilities, duties and obligations with respect to such Remaining Party under and with respect of the Novated Amount of a transaction. In a four-way novation the party referenced is Transferor 2 per the ISDA definition and acts in the role of a Transferor. Transferor 2 transfers by novation to Transferee 2 all of its rights, liabilities, duties and obligations with respect to Transferor 1. ISDA 2004 Novation Term: Remaining Party (three-way novation) or Transferor 2 (four-way novation).

**otherRemainingParty** (zero or one occurrence; of the type PartyReference) A pointer style reference to a party identifier defined elsewhere in the document. This element is not applicable in a three-way novation and should be omitted. In a four-way novation the party referenced is Transferee 2. Transferee 2 means a party which accepts by way of novation the rights, liabilities, duties and obligations of Transferor 2. ISDA 2004 Novation Term: Transferee 2 (four-way novation).

**novationDate** (exactly one occurrence; of the type xsd:date) Specifies the date that one party's legal obligations with regard to a trade are transferred to another party. It corresponds to the Novation Date section of the 2004 ISDA Novation Definitions, section 1.16.

**novationTradeDate** (zero or one occurrence; of the type xsd:date) Specifies the date the parties agree to assign or novate a trade. If this element is not specified, the novationTradeDate will be deemed to be the novationDate. It corresponds to the Novation Trade Date section of the 2004 ISDA Novation Definitions, section 1.17.

Either

**novatedAmount** (exactly one occurrence; of the type Money) The amount which represents the portion of the Old Transaction being novated.

Or

**novatedNumberOfOptions** (exactly one occurrence; of the type xsd:decimal) The number of options which represent the portion of the Old Transaction being novated.

**remainingTrade** (zero or one occurrence; of the type Trade) This element contains a description of the remaining portion of a partially novated trade.

**fullFirstCalculationPeriod** (zero or one occurrence; of the type xsd:boolean) This element corresponds to the applicability of the Full First Calculation Period as defined in the 2004 ISDA Novation Definitions, section 1.20.

**firstPeriodStartDate** (zero or one occurrence; of the type FirstPeriodStartDate) Element that is used to be able to make sense of the "new transaction" without requiring reference back to the "old transaction". In the case of interest rate products there are potentially 2 "first period start dates" to reference – one with respect to each party to the new transaction. For Credit Default Swaps there is just the one with respect to the party that is the fixed rate payer.

**nonReliance** (zero or one occurrence; of the type Empty) This element corresponds to the non-Reliance section in the 2004 ISDA Novation Definitions, section 2.1 (c) (i). The element appears in the instance document when non-Reliance is applicable.

**creditDerivativesNotices** (zero or one occurrence; of the type CreditDerivativesNotices) This element should be specified if one or more of either a Credit Event Notice, Notice of Publicly Available Information, Notice of Physical Settlement or Notice of Intended Physical Settlement, as applicable, has been delivered by or to the Transferor or the Remaining Party. The type of notice or notices that have been delivered should be indicated by setting the relevant boolean element value(s) to true. The absence of the element means that no Credit Event Notice, Notice of Publicly Available Information, Notice of Physical Settlement or Notice of Intended Physical Settlement, as applicable, has been delivered by or to the Transferor or the Remaining Party.

**contractualDefinitions** (zero or more occurrences; of the type ContractualDefinitions) The definitions (such as those published by ISDA) that will define the terms of the novation transaction.

Either

**contractualSupplement** (zero or more occurrences; of the type ContractualSupplement) DEPRECATED - This element will be removed in the next major version of FpML. The element contractualTermsSupplement should be used instead. Definition: A contractual supplement (such as those published by ISDA) that will apply to the trade.

Or

**contractualTermsSupplement** (zero or more occurrences; of the type ContractualTermsSupplement) A contractual supplement (such as those published by ISDA) that will apply to the trade.

## 2.2 NovationMessage.model

### 2.2.1 Description:

### 2.2.2 Contents:

**novation** (exactly one occurrence; of the type Novation)

**party** (one or more occurrences; of the type Party)

### 2.2.3 Used by:

- Complex type: NovationNotificationMessage
- Complex type: NovationRequestMessage
- Complex type: NovationResponseMessage

### 2.2.4 Figure:

### 2.2.5 Schema Fragment:

```
<xsd:group name="NovationMessage.model">
  <xsd:sequence>
    <xsd:element name="novation" type="Novation"/>
    <xsd:element name="party" type="Party" minOccurs="3" maxOccurs="unbounded"/>
  </xsd:sequence>
</xsd:group>
```

## 2.3 TerminationDetails.model

### 2.3.1 Description:

### 2.3.2 Contents:

**terminationTradeDate** (exactly one occurrence; of the type xsd:date) The date on which the the parties enter into the Termination transaction.

**terminationEffectiveDate** (exactly one occurrence; of the type xsd:date) The date on which the Termination becomes effective.

Either

**full** (exactly one occurrence; of the type Empty) The use of the Full element indicates that this is a Full Termination.

Or

**partial** (exactly one occurrence; of the type PartialTerminationAmount) The use of the Partial element indicates that this is a Partial Termination.

### 2.3.3 Used by:

- Complex type: Termination
