1 Global Complex Types

1.1 CancelTradeConfirmation

1.1.1 Description:

A type defining the content model for a message requesting that a previously requested TradeConfirmation process be cancelled.

1.1.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type RequestMessage)

- A type defining the basic content of a message that requests the receiver to perform some business operation determined by the message type and its content.

partyTradeIdentifier (exactly one occurrence; of the type PartyTradeIdentifier) The trade reference identifier(s) allocated to the trade by the parties involved.

party (exactly one occurrence; of the type Party) An entity having a role in a trade lifecycle. For example, the principal parties obligated to make payments from time to time during the term of the trade, but may include other parties involved in, or incidental to, the trade, such as parties acting in the role of novation transferor/transferee, broker, calculation agent, etc.

1.1.3 Used by:

1.1.4 Derived Types:

1.1.5 Figure:

1.2 CancelTradeMatch

1.2.1 Description:

A type defining the content model for a message requesting that a previously requested TradeMatch process be cancelled.

1.2.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type RequestMessage)

- A type defining the basic content of a message that requests the receiver to perform some business operation determined by the message type and its content.

partyTradeIdentifier (exactly one occurrence; of the type PartyTradeIdentifier) The trade reference identifier(s) allocated to the trade by the parties involved.

party (exactly one occurrence; of the type Party) The parties relating to the trade. These will include, at a minimum, the principal parties obligated to make payments from time to time during the term of the trade, but may include other parties involved in, or incidental to, the trade, such as parties acting in the role of novation transferor/transferee, broker, calculation agent, accountant, confirmation agent etc. In particular, parties paying or receiving fees, commissions etc. must be specified if referenced in otherPartyPayments. It may also service an account of a party that is party to the trade, but is not itself a party to the trade.

</xsd:complexType>
```

1.3 ConfirmationCancelled

1.3.1 Description:

A type defining the content model for the message generated in response to a CancelConfirmation request under normal circumstances.

1.3.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type ResponseMessage)

- A type refining the generic message content model to make it specific to response messages.

tradeIdentifier (exactly one occurrence; of the type TradeIdentifier) An instance of a unique trade identifier.

party (exactly one occurrence; of the type Party) The parties relating to the trade. These will include, at a minimum, the principal parties obligated to make payments from time to time during the term of the trade, but may include other parties involved in, or incidental to, the trade, such as parties acting in the role of novation transferor/transferee, broker, calculation agent, accountant, confirmation agent etc. In particular, parties paying or receiving fees, commissions etc. must be specified if referenced in otherPartyPayments. 1.18 TradeConfirmed

1.18.1 Description:

A type defining the content model of a message generated when a trade is determined to be confirmed.

1.18.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type NotificationMessage)

- A type defining the basic content for a message sent to inform another system that some 'business event' has occurred. Notifications are not expected to be replied to.

trade (exactly one occurrence; of the type Trade) The root element in an FpML trade document.

party (one or more occurrences; of the type Party) The parties relating to the trade. These will include, at a minimum, the principal parties obligated to make payments from time to time during the term of the trade, but may include other parties involved in, or incidental to, the trade, such as parties acting in the role of novation transferor/transferee, broker, calculation agent, accountant, confirmation agent etc. In particular, parties paying or receiving fees, commissions etc. must be specified if referenced in otherPartyPayments. It may also service an account of a party that is party to the trade, but is not itself a party to the trade.

1.19 TradeErrorResponse

1.19.1 Description:

An abstract trade error response message containing a single trade or trade reference.

1.19.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type ResponseMessage)

- A type refining the generic message content model to make it specific to response messages.

Either

trade (exactly one occurrence; of the type Trade) An element that allows the full details of the trade to be used as a mechanism for identifying the trade for which the post-trade event pertains

Or

tradeReference (exactly one occurrence; of the type PartyTradeIdentifiers) A container since an individual trade can be referenced by two or more different partyTradeIdentifier elements - each allocated by a different party.

party (one or more occurrences; of the type Party) The parties relating to the trade. These will include, at a minimum, the principal parties obligated to make payments from time to time during the term of the trade, but may include other parties involved in, or incidental to, the trade, such as parties acting in the role of novation transferor/transferee, broker, calculation agent, accountant, confirmation agent etc. In particular, parties paying or receiving fees, commissions etc. must be specified if referenced in otherPartyPayments. It may also service an account of a party that is party to the trade, but is not itself a party to the trade.

1.20 TradeMatched

1.20.1 Description:

A type defining the content model for a message indicating that a correlation has been made between two transactions.

1.20.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type NotificationMessage)

- A type defining the basic content for a message sent to inform another system that some 'business event' has occurred. Notifications are not expected to be replied to.

tradeIdentifier (one or more occurrences; of the type TradeIdentifier) An instance of a unique trade identifier.

differences (zero or more occurrences; of the type TradeDifference)

party (one or more occurrences; of the type Party) The parties relating to the trade. These will include, at a minimum, the principal parties obligated to make payments from time to time during the term of the trade, but may include other parties involved in, or incidental to, the trade, such as parties acting in the role of novation transferor/transferee, broker, calculation agent, accountant, confirmation agent etc. In particular, parties paying or receiving fees, commissions etc. must be specified if referenced in otherPartyPayments. It may also service an account of a party that is party to the trade, but is not itself a party to the trade.
