## ***1 Global Complex Types***

## 1.1 Asian

### 1.1.1 Description:

As per ISDA 2002 Definitions

### 1.1.2 Contents:

**averagingInOut** (exactly one occurrence; of the type AveragingInOutEnum)

**strikeFactor** (zero or one occurrence; of the type xsd:decimal) The factor of strike.

**averagingPeriodIn** (zero or one occurrence; of the type AveragingPeriod) The averaging in period.

**averagingPeriodOut** (zero or one occurrence; of the type AveragingPeriod) The averaging out period.

### 1.1.3 Used by:

- Complex type: OptionFeatures

### 1.1.4 Derived Types:

### 1.1.5 Figure:

### 1.1.6 Schema Fragment:

```
<xsd:complexType name="Asian">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">
      As per ISDA 2002 Definitions
    </xsd:documentation>

    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

## 1.2 AveragingPeriod

### 1.2.1 Description:

Period over which an average value is taken

### 1.2.2 Contents:

**schedule** (zero or more occurrences; of the type AveragingSchedule) A Equity Derivative schedule.

**averagingDateTimes** (zero or one occurrence; of the type DateTimeList) Averaging DateTimes

**marketDisruption** (exactly one occurrence; of the type MarketDisruption) The market disruption event as defined by ISDA 2002 Definitions

### 1.2.3 Used by:

- Complex type: Asian

### 1.2.4 Derived Types:

### 1.2.5 Figure:

### 1.2.6 Schema Fragment:

```

      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

## 1.3 AveragingSchedule

### 1.3.1 Description:

Method of generating a series of dates.

### 1.3.2 Contents:

**startDate** (exactly one occurrence; of the type xsd:date) Date on which this period begins.

**endDate** (exactly one occurrence; of the type xsd:date) Date on which this period ends.

**frequency** (exactly one occurrence; of the type xsd:positiveInteger) The schedule frequency.

**frequencyType** (exactly one occurrence; of the type FrequencyType) The schedule frequency type.

**weekNumber** (zero or one occurrence; of the type xsd:positiveInteger) The schedule week number.

**dayOfWeek** (zero or one occurrence; of the type WeeklyRollConventionEnum) Day of the Week.

### 1.3.3 Used by:

- Complex type: AveragingPeriod
- Complex type: TriggerEvent

### 1.3.4 Derived Types:

### 1.3.5 Figure:

### 1.3.6 Schema Fragment:

  </xsd:sequence>
</xsd:complexType>
```

## 1.6 ClassifiedPayment

### 1.6.1 Description:

A Classified Simple Payment.

### 1.6.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type SimplePayment)

- A complex type to specified payments in a simpler fashion than the Payment type. This construct should be used from the version 4.3 onwards.

**paymentType** (zero or more occurrences; of the type PaymentType) Classification of this Payment.

### 1.6.3 Used by:

- Complex type: NettedSwapBase

### 1.6.4 Derived Types:

### 1.6.5 Figure:

### 1.6.6 Schema Fragment:

```
<xsd:complexType name="ClassifiedPayment">
  <xsd:annotation>

              Classification of this Payment.
            </xsd:documentation>
          </xsd:annotation>
        </xsd:element>
      </xsd:sequence>
    </xsd:extension>
  </xsd:complexContent>
</xsd:complexType>
```

## 1.7 Composite

### 1.7.1 Description:

Specifies the conditions to be applied for converting into a reference currency when the actual currency rate is not determined upfront.

### 1.7.2 Contents:

**determinationMethod** (zero or one occurrence; of the type DeterminationMethod) Specifies the method according to which an amount or a date is determined.

**relativeDate** (zero or one occurrence; of the type RelativeDateOffset) A date specified as some offset to another date (the anchor date).

**fxSpotRateSource** (zero or one occurrence; of the type FxSpotRateSource) Specifies the methodology (reference source and, optionally, fixing time) to be used for determining a currency conversion rate.

### 1.7.3 Used by:

- Complex type: FxFeature

### 1.7.4 Derived Types:

### 1.7.5 Figure:

### 1.7.6 Schema Fragment:

      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

## 1.8 CreditEventNotice

### 1.8.1 Description:

### 1.8.2 Contents:

**notifyingParty** (exactly one occurrence; of the type NotifyingParty) Pointer style references to a party identifier defined elsewhere in the document. The notifying party is the party that notifies the other party when a credit event has occurred by means of a credit event notice. If more than one party is referenced as being the notifying party then either party may notify the other of a credit event occurring. ISDA 2003 Term: Notifying Party

**businessCenter** (zero or one occurrence; of the type BusinessCenter) Inclusion of this business center element implies that Greenwich Mean Time in Section 3.3 of the 2003 ISDA Credit Derivatives Definitions is replaced by the local time of the city indicated by the businessCenter element value.

**publiclyAvailableInformation** (zero or one occurrence; of the type PubliclyAvailableInformation) A specified condition to settlement. Publicly available information means information that reasonably confirms any of the facts relevant to determining that a credit event or potential repudiation/moratorium, as applicable, has occurred. The ISDA defined list (2003) is the market standard and is considered comprehensive, and a minimum of two differing public sources must have published the relevant information, to declare a Credit Event. ISDA 2003 Term: Notice of Publicly Available Information Applicable

### 1.8.3 Used by:

</xsd:sequence>  
</xsd:complexType>
```

## 1.9 CreditEvents

### 1.9.1 Description:

### 1.9.2 Contents:

**bankruptcy** (zero or one occurrence; of the type Empty) A credit event. The reference entity has been dissolved or has become insolvent. It also covers events that may be a precursor to insolvency such as instigation of bankruptcy or insolvency proceedings. Sovereign trades are not subject to Bankruptcy as "technically" a Sovereign cannot become bankrupt. ISDA 2003 Term: Bankruptcy

**failureToPay** (zero or one occurrence; of the type FailureToPay) A credit event. This credit event triggers, after the expiration of any applicable grace period, if the reference entity fails to make due payments in an aggregate amount of not less than the payment requirement on one or more obligations (e.g. a missed coupon payment). ISDA 2003 Term: Failure to Pay

**failureToPayPrincipal** (zero or one occurrence; of the type Empty) A credit event. Corresponds to the failure by the Reference Entity to pay an expected principal amount or the payment of an actual principal amount that is less than the expected principal amount. ISDA 2003 Term: Failure to Pay Principal.

**failureToPayInterest** (zero or one occurrence; of the type Empty) A credit event. Corresponds to the failure by the Reference Entity to pay an expected interest amount or the payment of an actual interest amount that is less than the expected interest amount. ISDA 2003 Term: Failure to Pay Interest.

**obligationDefault** (zero or one occurrence; of the type Empty) A credit event. One or more of the obligations have become capable of being declared due and payable before they would otherwise have been due and payable as a result of, or on the basis of, the occurrence of a default, event of default or other similar condition or event other than failure to pay. ISDA 2003 Term: Obligation Default

**obligationAcceleration** (zero or one occurrence; of the type Empty) A credit event. One or more of the obligations have been declared due and payable before they would otherwise have been due and payable as a result of, or on the basis of, the occurrence of a default, event of default or other similar condition or event other than failure to pay (preferred by the market over Obligation Default, because more definitive and encompasses the definition of Obligation Default - this is more favorable to the Seller). Subject to the default requirement amount. ISDA 2003 Term: Obligation Acceleration

**repudiationMoratorium** (zero or one occurrence; of the type Empty) A credit event. The reference entity, or a governmental authority, either refuses to recognise or challenges the validity of one or more obligations of the reference entity, or imposes a moratorium thereby postponing payments on one or more of the obligations of the reference entity. Subject to the default requirement amount. ISDA 2003 Term: Repudiation/Moratorium

**restructuring** (zero or one occurrence; of the type Restructuring) A credit event. A restructuring is an event that materially impacts the reference entity's obligations, such as an interest rate reduction, principal reduction, deferral of interest or principal, change in priority ranking, or change in currency or composition of payment. ISDA 2003 Term: Restructuring

**distressedRatingsDowngrade** (zero or one occurrence; of the type Empty) A credit event. Results from the fact that the rating of the reference obligation is downgraded to a distressed rating level. From a usage standpoint, this credit event is typically not applicable in case of RMBS trades.

**maturityExtension** (zero or one occurrence; of the type Empty) A credit event. Results from the fact that the underlier fails to make principal payments as expected.

**written down** (zero or one occurrence; of the type Empty) A credit event. Results from the fact that the underlier writes down its outstanding principal amount.

**defaultRequirement** (zero or one occurrence; of the type Money) In relation to certain credit events, serves as a threshold for Obligation Acceleration, Obligation Default, Repudiation/Moratorium and Restructuring. Market standard is USD 10,000,000 (JPY 1,000,000,000 for all Japanese Yen trades). This is applied on an aggregate or total basis across all Obligations of the Reference Entity. Used to prevent technical/operational errors from triggering credit events. ISDA 2003 Term: Default Requirement

**creditEventNotice** (zero or one occurrence; of the type CreditEventNotice) A specified condition to settlement. An irrevocable written or verbal notice that describes a credit event that has occurred. The notice is sent from the notifying party (either the buyer or the seller) to the counterparty. It provides information relevant to determining that a credit event has occurred. This is typically accompanied by Publicly Available Information. ISDA 2003 Term: Credit Event Notice

  </xsd:complexContent>
</xsd:complexType>
```

## 1.11 FailureToPay

### 1.11.1 Description:

### 1.11.2 Contents:

**gracePeriodExtension** (zero or one occurrence; of the type GracePeriodExtension) If this element is specified, indicates whether or not a grace period extension is applicable. ISDA 2003 Term: Grace Period Extension Applicable

**paymentRequirement** (zero or one occurrence; of the type Money) Specifies a threshold for the failure to pay credit event. Market standard is USD 1,000,000 (JPY 100,000,000 for Japanese Yen trades) or its equivalent in the relevant obligation currency. This is applied on an aggregate basis across all Obligations of the Reference Entity. Intended to prevent technical/operational errors from triggering credit events. ISDA 2003 Term: Payment Requirement

### 1.11.3 Used by:

- Complex type: CreditEvents

## 1.12 FeaturePayment

### 1.12.1 Description:

Payment made following trigger occurrence.

### 1.12.2 Contents:

**payerPartyReference** (exactly one occurrence; of the type PartyOrAccountReference) A reference to the party responsible for making the payments defined by this structure.

**receiverPartyReference** (exactly one occurrence; of the type PartyOrAccountReference) A reference to the party that receives the payments corresponding to this structure.

Either

**levelPercentage** (exactly one occurrence; of the type xsd:decimal) The trigger level percentage.

Or

**amount** (exactly one occurrence; of the type NonNegativeDecimal) The monetary quantity in currency units.

**time** (zero or one occurrence; of the type TimeTypeEnum) The feature payment time.

**currency** (zero or one occurrence; of the type Currency) The currency in which an amount is denominated.

**featurePaymentDate** (zero or one occurrence; of the type AdjustableOrRelativeDate) The feature payment date.

### 1.12.3 Used by:

- Complex type: TriggerEvent

## 1.14 FxFeature

### 1.14.1 Description:

A type for defining Fx Features.

### 1.14.2 Contents:

**referenceCurrency** (exactly one occurrence; of the type IdentifiedCurrency) Specifies the reference currency of the trade.

Either

**composite** (exactly one occurrence; of the type Composite) If "Composite" is specified as the Settlement Type in the relevant Transaction Supplement, an amount in the Settlement Currency, determined by the Calculation Agent as being equal to the number of Options exercised or deemed exercised, multiplied by: (Settlement Price – Strike Price) / (Strike Price – Settlement Price) x Multiplier provided that if the above is equal to a negative amount the Option Cash Settlement Amount shall be deemed to be zero.

Or

**quanto** (exactly one occurrence; of the type Quanto) If "Quanto" is specified as the Settlement Type in the relevant Transaction Supplement, an amount, as determined by the Calculation Agent in accordance with the Section 8.2 of the Equity Definitions

Or

**crossCurrency** (exactly one occurrence; of the type Composite) If "Cross-Currency" is specified as the Settlement Type in the relevant Transaction Supplement, an amount in the Settlement Currency, determined by the Calculation Agent as being equal to the number of Options exercised or deemed exercised, multiplied by: (Settlement Price – Strike Price) / (Strike Price – Settlement Price) x Multiplier x one unit of the Reference Currency converted into an amount in the Settlement Currency using the rate of exchange of the Settlement Currency as quoted on the Reference Price Source on the Valuation Date, provided that if the above is equal to a negative amount the Option Cash Settlement Amount shall be deemed to be zero

### 1.14.3 Used by:

  </xsd:sequence>
</xsd:complexType>
```

## 1.19 OptionBase

### 1.19.1 Description:

A type for defining the common features of options

### 1.19.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type Product)

- The base type which all FpML products extend.

**buyerPartyReference** (exactly one occurrence; of the type PartyOrTradeSideReference) A reference to the party that buys this instrument, ie. pays for this instrument and receives the rights defined by it. See 2000 ISDA definitions Article 11.1 (b). In the case of FRAs this the fixed rate payer.

**sellerPartyReference** (exactly one occurrence; of the type PartyOrTradeSideReference) A reference to the party that sells ("writes") this instrument, i.e. that grants the rights defined by this instrument and in return receives a payment for it. See 2000 ISDA definitions Article 11.1 (a). In the case of FRAs this is the floating rate payer.

**optionType** (exactly one occurrence; of the type OptionTypeEnum) The type of option transaction. From a usage standpoint, put/call is the default option type, while payer/receiver indicator is used for options index credit default swaps, consistently with the industry practice. Straddle is used for the case of straddle strategy, that combine a call and a put with the same strike.

### 1.19.3 Used by:

- Complex type: OptionBaseExtended

### 1.19.4 Derived Types:

- Complex type: OptionBaseExtended

### 1.19.5 Figure:

### 1.19.6 Schema Fragment:

      </xsd:sequence>
    </xsd:extension>
  </xsd:complexContent>
</xsd:complexType>
```

## 1.20 OptionBaseExtended

### 1.20.1 Description:

Base type for options starting with the 4-3 release, until we refactor the schema as part of the 5-0 release series

### 1.20.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type OptionBase)

- A type for defining the common features of options

**premium** (zero or one occurrence; of the type Premium) The option premium payable by the buyer to the seller

**exercise** (exactly one occurrence; of the type Exercise) An placeholder for the actual option exercise definitions.

**exerciseProcedure** (exactly one occurrence; of the type ExerciseProcedure) A set of parameters defining procedures associated with the exercise.

**feature** (zero or one occurrence; of the type OptionFeature) An Option feature such as quanto, asian, barrier, knock

Either

**notionalReference** (exactly one occurrence; of the type NotionalAmountReference)

Or

**notionalAmount** (exactly one occurrence; of the type Money)

**optionEntitlement** (exactly one occurrence; of the type PositiveDecimal) The number of units of underlying per option comprised in the option transaction.

**entitlementCurrency** (zero or one occurrence; of the type Currency) TODO

**numberOfOptions** (zero or one occurrence; of the type PositiveDecimal) The number of options comprised in the option transaction.

**settlementType** (zero or one occurrence; of the type SettlementTypeEnum)

**settlementDate** (zero or one occurrence; of the type AdjustableOrRelativeDate)

### 1.20.3 Used by:

- Complex type: BondOption
- Complex type: CreditDefaultSwapOption

### 1.20.4 Derived Types:

- Complex type: BondOption
- Complex type: CreditDefaultSwapOption

## 1.21 OptionFeature

### 1.21.1 Description:

A type for defining option features.

### 1.21.2 Contents:

**fxFeature** (zero or one occurrence; of the type FxFeature) A quanto or composite FX feature.

**strategyFeature** (zero or one occurrence; of the type StrategyFeature) A simple strategy feature

**asian** (zero or one occurrence; of the type Asian) An option where and average price is taken on valuation.

**barrier** (zero or one occurrence; of the type Barrier) An option with a barrier feature.

**knock** (zero or one occurrence; of the type Knock) A knock feature.

**passThrough** (zero or one occurrence; of the type PassThrough) Pass through payments from the underlyer, such as dividends.

### 1.21.3 Used by:

- Complex type: OptionBaseExtended

### 1.21.4 Derived Types:

### 1.21.5 Figure:

### 1.21.6 Schema Fragment:

```
<xsd:complexType name="OptionFeature">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">
      A type for defining option features.
    </xsd:documentation>

    <xsd:group ref="OptionBaseFeature.model"/>
    <xsd:group ref="OptionFeature.model"/>
  </xsd:sequence>
</xsd:complexType>
```

## 1.22 OptionNumericStrike

### 1.22.1 Description:

A type for defining the strike price for an option as a numeric value without currency.

### 1.22.2 Contents:

Either

**strikePrice** (exactly one occurrence; of the type xsd:decimal) The price or level at which the option has been struck.

Or

**strikePercentage** (exactly one occurrence; of the type xsd:decimal) The price or level expressed as a percentage of the forward starting spot price.

### 1.22.3 Used by:

- Complex type: OptionStrike

### 1.22.4 Derived Types:

- Complex type: OptionStrike

### 1.22.5 Figure:

### 1.22.6 Schema Fragment:

```
<xsd:complexType name="OptionNumericStrike">

        </xsd:annotation>
      </xsd:element>
    </xsd:choice>
  </xsd:sequence>
</xsd:complexType>
```

## 1.23 OptionStrike

### 1.23.1 Description:

A type for defining the strike price for an equity option. The strike price is either: (i) in respect of an index option transaction, the level of the relevant index specified or otherwise determined in the transaction; or (ii) in respect of a share option transaction, the price per share specified or otherwise determined in the transaction. This can be expressed either as a percentage of notional amount or as an absolute value.

### 1.23.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type OptionNumericStrike)

- A type for defining the strike price for an option as a numeric value without currency.

**currency** (zero or one occurrence; of the type Currency) The currency in which an amount is denominated.

### 1.23.3 Used by:

- Complex type: BondOptionStrike
- Complex type: StrikeSpread

### 1.23.4 Derived Types:

### 1.23.5 Figure:

### 1.23.6 Schema Fragment:

```
<xsd:complexType name="OptionStrike">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">

      </xsd:sequence>
    </xsd:extension>
  </xsd:complexContent>
</xsd:complexType>
```

## 1.24 PassThrough

### 1.24.1 Description:

Type which contains pass through payments.

### 1.24.2 Contents:

**passThroughItem** (one or more occurrences; of the type PassThroughItem) One to many pass through payment items.

### 1.24.3 Used by:

- Complex type: OptionFeatures

### 1.24.4 Derived Types:

### 1.24.5 Figure:

### 1.24.6 Schema Fragment:

```
<xsd:complexType name="PassThrough">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">
      Type which contains pass through payments.
    </xsd:documentation>

    <xsd:element name="passThroughItem" type="PassThroughItem" maxOccurs="unbounded">
      <xsd:annotation>
        <xsd:documentation xml:lang="en">
          One to many pass through payment items.
        </xsd:documentation>
      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

## 1.25 PassThroughItem

### 1.25.1 Description:

Type to represent a single pass through payment.

### 1.25.2 Contents:

**payerPartyReference** (exactly one occurrence; of the type PartyOrAccountReference) A reference to the party responsible for making the payments defined by this structure.

**receiverPartyReference** (exactly one occurrence; of the type PartyOrAccountReference) A reference to the party that receives the payments corresponding to this structure.

**underlyerReference** (exactly one occurrence; of the type AssetReference) Reference to the underlyer whose payments are being passed through.

**passThroughPercentage** (exactly one occurrence; of the type xsd:decimal) Percentage of payments from the underlyer which are passed through.

### 1.25.3 Used by:

- Complex type: PassThrough

### 1.25.4 Derived Types:

### 1.25.5 Figure:

### 1.25.6 Schema Fragment:

```
<xsd:complexType name="PassThroughItem">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">
      Type to represent a single pass through payment.
    </xsd:documentation>

  <xsd:sequence>
    <xsd:group ref="PayerReceiver.model"/>
    <xsd:element name="underlyerReference" type="AssetReference">
      <xsd:annotation>
        <xsd:documentation xml:lang="en">
          Reference to the underlyer whose payments are being passed
          through.
        </xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="passThroughPercentage" type="xsd:decimal">
      <xsd:annotation>
        <xsd:documentation xml:lang="en">
          Percentage of payments from the underlyer which are passed
          through.
        </xsd:documentation>
      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

## 1.26 Premium

### 1.26.1 Description:

A type for defining a premium.

### 1.26.2 Contents:

Inherited element(s): (This definition inherits the content defined by the type SimplePayment)

- A complex type to specified payments in a simpler fashion than the Payment type. This construct should be used from the version 4.3 onwards.

**premiumType** (zero or one occurrence; of the type PremiumTypeEnum) Forward start Premium type

**pricePerOption** (zero or one occurrence; of the type Money) The amount of premium to be paid expressed as a function of the number of options.

**percentageOfNotional** (zero or one occurrence; of the type xsd:decimal) The amount of premium to be paid expressed as a percentage of the notional value of the transaction. A percentage of 5% would be expressed as 0.05.

**discountFactor** (zero or one occurrence; of the type xsd:decimal) The value representing the discount factor used to calculate the present value of the cash flow.

**presentValueAmount** (zero or one occurrence; of the type Money) The amount representing the present value of the forecast payment.

### 1.26.3 Used by:

- Complex type: OptionBaseExtended

### 1.26.4 Derived Types:

### 1.26.5 Figure:

### 1.26.6 Schema Fragment:

```
<xsd:complexType name="Premium">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">
      A type for defining a premium.
    </xsd:documentation>
  </xsd:annotation>
  <xsd:complexContent>
    <xsd:extension base="SimplePayment">
      <xsd:sequence>
        <xsd:group ref="Premium.model" minOccurs="0"/>
        <xsd:group ref="PaymentDiscounting.model" minOccurs="0"/>
      </xsd:sequence>
    </xsd:extension>
  </xsd:complexContent>
</xsd:complexType>
```

## 1.27 PubliclyAvailableInformation

### 1.27.1 Description:

### 1.27.2 Contents:

**standardPublicSources** (zero or one occurrence; of the type Empty) If this element is specified, indicates that ISDA defined Standard Public Sources are applicable.

**publicSource** (zero or more occurrences; of the type xsd:string) A public information source, e.g. a particular newspaper or electronic news service, that may publish relevant information used in the determination of whether or not a credit event has occurred. ISDA 2003 Term: Public Source

**specifiedNumber** (zero or one occurrence; of the type xsd:positiveInteger) The minimum number of the specified public information sources that must publish information that reasonably confirms that a credit event has occurred. The market convention is two. ISDA 2003 Term: Specified Number

### 1.27.3 Used by:

- Complex type: CreditEventNotice

### 1.27.4 Derived Types:

### 1.27.5 Figure:

### 1.27.6 Schema Fragment:

          electronic news service, that may publish relevant
          information used in the determination of whether or not a
          credit event has occurred. ISDA 2003 Term: Public Source
        </xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="specifiedNumber" type="xsd:positiveInteger" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation xml:lang="en">
          The minimum number of the specified public information
          sources that must publish information that reasonably
          confirms that a credit event has occurred. The market
          convention is two. ISDA 2003 Term: Specified Number
        </xsd:documentation>
      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

## 1.28 Quanto

### 1.28.1 Description:

Determines the currency rate that the seller of the equity amounts will apply at each valuation date for converting the respective amounts into a currency that is different from the currency denomination of the underlyer.

### 1.28.2 Contents:

**fxRate** (zero or more occurrences; of the type FxRate) Specifies a currency conversion rate.

**fxSpotRateSource** (zero or one occurrence; of the type FxSpotRateSource) Specifies the methodology (reference source and, optionally, fixing time) to be used for determining a currency conversion rate.

### 1.28.3 Used by:

- Complex type: FxFeature

### 1.28.4 Derived Types:

### 1.28.5 Figure:

### 1.28.6 Schema Fragment:

```
<xsd:complexType name="Quanto">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">

        </xsd:documentation>
      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:complexType>
```

## 1.29 Restructuring

### 1.29.1 Description:

### 1.29.2 Contents:

**restructuringType** (zero or one occurrence; of the type RestructuringType) Specifies the type of restructuring that is applicable.

**multipleHolderObligation** (zero or one occurrence; of the type Empty) In relation to a restructuring credit event, unless multiple holder obligation is not specified restructurings are limited to multiple holder obligations. A multiple holder obligation means an obligation that is held by more than three holders that are not affiliates of each other and where at least two thirds of the holders must agree to the event that constitutes the restructuring credit event. ISDA 2003 Term: Multiple Holder Obligation

**multipleCreditEventNotices** (zero or one occurrence; of the type Empty) Presence of this element indicates that Section 3.9 of the 2003 Credit Derivatives Definitions shall apply. Absence of this element indicates that Section 3.9 shall not apply. NOTE: Not allowed under ISDA Credit 1999.

### 1.29.3 Used by:

- Complex type: CreditEvents

### 1.29.4 Derived Types:

### 1.29.5 Figure:

</xsd:complexType>
```

## 1.34 TriggerEvent

### 1.34.1 Description:

Observation point for trigger

### 1.34.2 Contents:

**schedule** (zero or more occurrences; of the type AveragingSchedule) A Equity Derivative schedule.

**triggerDates** (zero or one occurrence; of the type DateList) The trigger Dates

**trigger** (exactly one occurrence; of the type Trigger) The trigger level.

**featurePayment** (zero or one occurrence; of the type FeaturePayment) The feature payment.

### 1.34.3 Used by:

- Complex type: Barrier
- Complex type: Knock

### 1.34.4 Derived Types:

### 1.34.5 Figure:

### 1.34.6 Schema Fragment:

```
<xsd:complexType name="TriggerEvent">
  <xsd:annotation>

## ***2 Groups***

## 2.1 OptionBaseFeature.model

### 2.1.1 Description:

A model group containing Option Base Feature Elements

### 2.1.2 Contents:

**fxFeature** (zero or one occurrence; of the type FxFeature) A quanto or composite FX feature.

**strategyFeature** (zero or one occurrence; of the type StrategyFeature) A simple strategy feature

### 2.1.3 Used by:

- Complex type: OptionFeature

### 2.1.4 Figure:

### 2.1.5 Schema Fragment:

```
<xsd:group name="OptionBaseFeature.model">
  <xsd:annotation>
    <xsd:documentation xml:lang="en">
      A model group containing Option Base Feature Elements
    </xsd:documentation>
  </xsd:annotation>
  <xsd:sequence>
    <xsd:element name="fxFeature" type="FxFeature" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation xml:lang="en">
          A quanto or composite FX feature.
        </xsd:documentation>
      </xsd:annotation>
    </xsd:element>
    <xsd:element name="strategyFeature" type="StrategyFeature" minOccurs="0">
      <xsd:annotation>
        <xsd:documentation xml:lang="en">
          A simple strategy feature
        </xsd:documentation>
      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:group>
```

## 2.2 OptionDenomination.model

### 2.2.1 Description:

A model group containing the option denomination components.

### 2.2.2 Contents:

**optionEntitlement** (exactly one occurrence; of the type PositiveDecimal) The number of units of underlyer per option comprised in the option transaction.

**entitlementCurrency** (zero or one occurrence; of the type Currency) TODO

**numberOfOptions** (zero or one occurrence; of the type PositiveDecimal) The number of options comprised in the option transaction.

### 2.2.3 Used by:

- Complex type: OptionBaseExtended

### 2.2.4 Figure:

### 2.2.5 Schema Fragment:

```
<xsd:group name="OptionDenomination.model">

    </xsd:element>
  </xsd:sequence>
</xsd:group>
```

## 2.3 OptionFeature.model

### 2.3.1 Description:

A model group containing Option Base Feature Elements

### 2.3.2 Contents:

**asian** (zero or one occurrence; of the type Asian) An option where and average price is taken on valuation.

**barrier** (zero or one occurrence; of the type Barrier) An option with a barrier feature.

**knock** (zero or one occurrence; of the type Knock) A knock feature.

**passThrough** (zero or one occurrence; of the type PassThrough) Pass through payments from the underlyer, such as dividends.

### 2.3.3 Used by:

- Complex type: OptionFeature

### 2.3.4 Figure:

### 2.3.5 Schema Fragment:

```
<xsd:group name="OptionFeature.model">
  <xsd:annotation>

        </xsd:documentation>
      </xsd:annotation>
    </xsd:element>
  </xsd:sequence>
</xsd:group>
```

## 2.4 OptionSettlement.model

### 2.4.1 Description:

A group which has Option Settlement elements

### 2.4.2 Contents:

**settlementType** (zero or one occurrence; of the type SettlementTypeEnum)

**settlementDate** (zero or one occurrence; of the type AdjustableOrRelativeDate)

Either

**settlementAmount** (exactly one occurrence; of the type Money) Settlement Amount

Or

**settlementCurrency** (exactly one occurrence; of the type Currency) Settlement Currency for use where the Settlement Amount cannot be known in advance

### 2.4.3 Used by:

- Complex type: DirectionalLegUnderlyer
- Complex type: OptionBaseExtended

### 2.4.4 Figure:

                    are limited to multiple holder obligations. A multiple
                    holder obligation means an obligation that is held by more
                    than three holders that are not affiliates of each other
                    and where at least two thirds of the holders must agree to
                    the event that constitutes the restructuring credit event.
