and/or its Affiliates may, in its discretion, decide to engage in hedging activities with respect to the FX Transaction. Such activities may include buying and selling, on a dynamic basis, the underlying currency in the spot market or entering into derivatives on such currency. The hedging strategy may entail unwinding the hedge when a trigger event occurs under the FX Transaction. and/or its Affiliate may anticipate such event occurring and begin unwinding the hedge before such event occurs, or our hedging strategy may require greater and more frequent dynamic adjustments to the hedge as market prices approach the trigger. Unwinding or adjusting the hedge typically consists of buying or selling a quantity of the underlying currencies, or terminating or entering into derivatives positions with market counterparties. This activity may affect the likelihood of the trigger event occurring or not occurring. In addition, currency or currency derivative transactions that we execute in other capacities (such as trading for proprietary accounts, for accounts under management or to facilitate transactions on behalf of customers) may affect the probability that a trigger event will occur.
